

Un aer mai curat inseamna maini si suprafete mai curate.

Unitatile portabile de dezinfectie a aerului Novaerus utilizeaza tehnologia NanoStrike pe baza de plasma pentru a reduce virusii, bacteriile, particulele, sporii de mucegai, componentele organice volatile si mirosul din aer.

Defend 1050

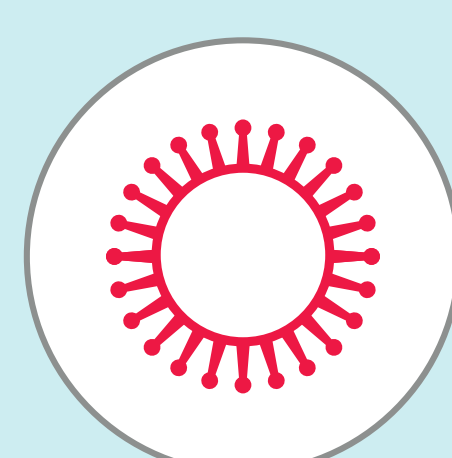

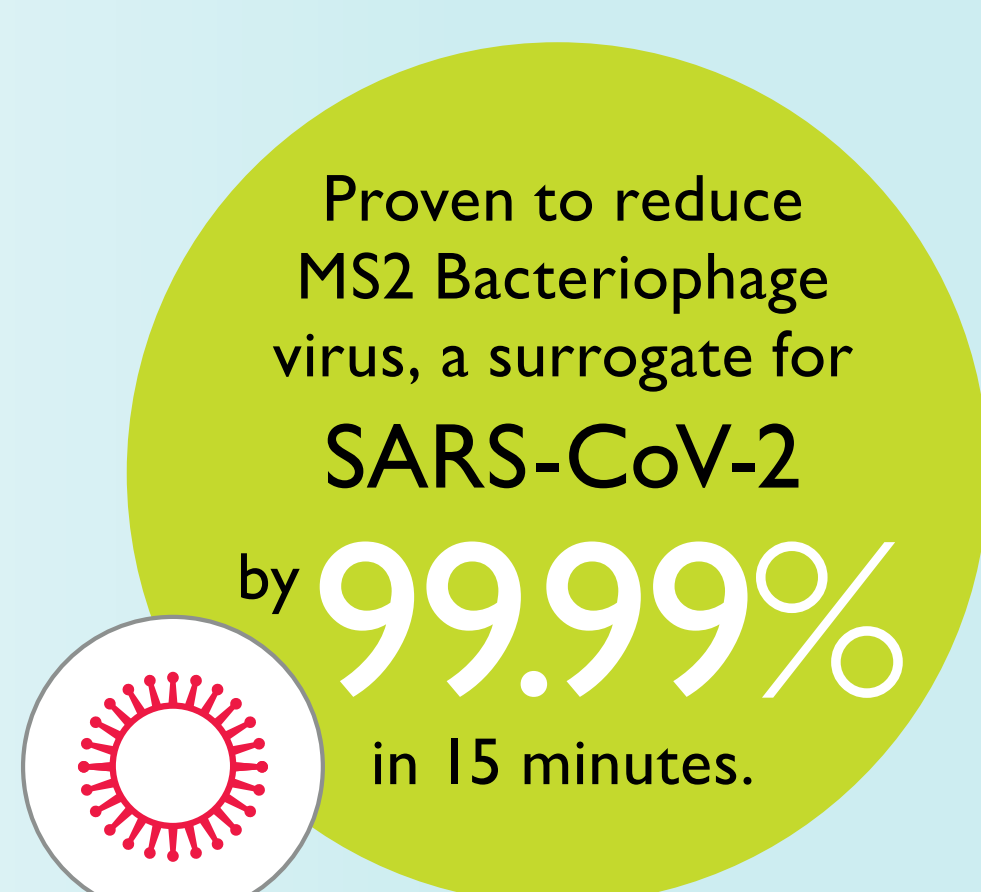

Defend 1050 cleared by FDA as 510(k) Class II Medical Device

Conceput pentru remedierea rapida in spatii mari si situatii cu risc ridicat de infectie, Novaerus Defend 1050 utilizeaza tehnologia NanoStrike pe baza de plasma cu un sistem de filtre Camfil® in trei trepte pentru a oferi o solutie combinata pentru dezinfectarea aerului si indepartarea particulelor. Unitate de sine statatoare, poate fi rotita cu usurinta pana la punctul de ingrijire si se conecteaza la orice priza.

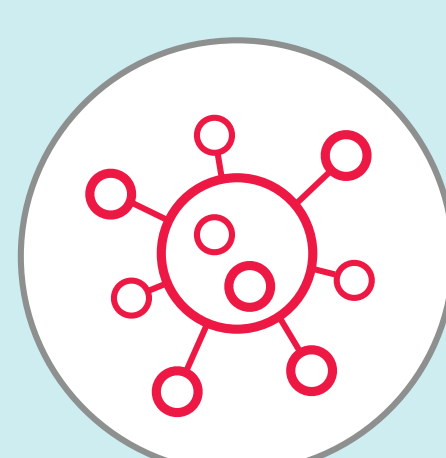

Protect 800 / 200

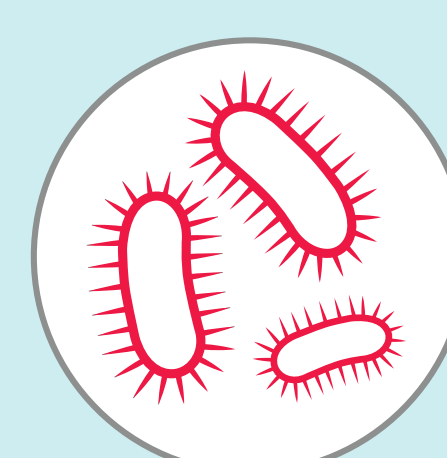

Proiectate pentru dezinfectia continua a aerului si controlul mirosurilor in spatii mici si medii, Novaerus Protect 800/200 utilizeaza tehnologia NanoStrike pe baza de plasma, fara filtre, cu consum redus de energie si un ventilator cu doua sau cu o singura viteza. Ambele unitati pot fi montate pe perete sau plasate pe un blat si conectate la orice priza.
